Author’s Guidelines

Submission of a manuscript to Current Research in Nutrition and Food Science Journal for publication implies that the same work has not been either published or under consideration for publication in another Journal. Authors, in their cover note to the Editor, have to clearly mention whether the manuscript shall be considered as a Research Paper, Short Communication or Review Article and also confirm that the manuscript has not been submitted to any other Journal for publication. Authors publishing results from in vivo experiments involving animals or humans should state whether due permission for conduction of these experiments was obtained, from the relevant ethics committees, in the Materials and Methods section. In addition, authors wishing to publish research work involving human studies should also send a notary verified letter of approval from the Ethics Committee or the Institutional Review Board.

Manuscripts should be concisely written and conform to the following general requirements: Manuscripts should be typewritten in double-space in A4 sized sheets, only on one side, with a 2 cm margin on both sides. Not including illustrations, Research Papers, should not exceed 10-12 pages, Review Articles, 15-20 pages and Short Communications, 5-6 pages. Pages should be numbered consecutively, starting with the title page and the matter arranged in the following order: Title page, Abstract, Introduction, Materials and Methods, Results, Discussion or Results and Discussion, Acknowledgements, References, Illustrations (Tables and Figures including chemistry schemes along with titles and legends) and Figure and Table titles and legends. Abstract should start on a separate page and each table or figure should be on separate sheets. The titles “Abstract” and “Introduction” need not be mentioned. All other section titles should be in capital letters while subtitles in each section shall be in bold face lower case followed by a colon.

Preparation of Manuscripts: Research Papers

Authors desirous of submitting manuscripts for publication to Current Research in Nutrition and Food Science Journal are advised to refer to the current issue of the Journal to understand the format and style of papers that get published. Authors are also advised to go through the current set of Instructions to Authors and prepare their manuscripts accordingly. Information should be conveyed in simple language with the correct syntax. Care should be taken to avoid common
errors like having abbreviations in the Title or Abstract, beginning a sentence with a numeral, adding “etc.” after a few examples, dropping articles and using “&” instead of ‘and’ in the text. The usage of standard abbreviations and symbols is encouraged. Manuscripts that fail to conform to the requirements of the Journal, as specified under Instructions to Authors, will be rejected outright.

Manuscripts should be concisely written and conform to the following general requirements: Manuscripts should be typewritten in double-space in A4 sized sheets, only on one side, with a 2 cm margin on both sides. Not including illustrations, Research Papers, should not exceed 10-12 pages, Review Articles, 15-20 pages and Short Communications, 5-6 pages. Pages should be numbered consecutively, starting with the title page and the matter arranged in the following order: Title page, Abstract, Introduction, Materials and Methods, Results, Discussion or Results and Discussion, Acknowledgements, References, Illustrations (Tables and Figures including chemistry schemes along with titles and legends) and Figure and Table titles and legends. Abstract should start on a separate page and each table or figure should be on separate sheets. The titles “Abstract” and “Introduction” need not be mentioned. All other section titles should be in capital letters while subtitles in each section shall be in bold face lower case followed by a colon.

**Title Page** – Title page should contain title of the paper in bold face, title case (font size 14), names of the authors in normal face, upper case (font size 12) followed by the address(es) in normal face lower case. The author to whom all correspondence be addressed should be denoted by an asterisk mark. The title should be as short as possible and precisely indicate the nature of the work in the communication. Names of the authors should appear as initials followed by surnames for men and one given-name followed by surname for women. Full names may be given in some instances to avoid confusion. Names should not be prefixed or suffixed by titles or degrees. Names should be followed by the complete postal address or addresses with pin code numbers of the place(s), where the research work has been carried out. At the bottom left corner of the title page, please mention “For correspondence” and provide a functional e-mail address. Address of the corresponding author to whom all correspondence may be send, should be given only if it is different from the address already given under authors’ names. Trivial sub-titles such as ‘Title’, ‘Author’, ‘Address’ or ‘Place of Investigation’ shall not be included in the title page. Title page should be aligned centre except for “For correspondence”. Provide a running title or short title of not more than 50 characters

**Abstract:** Should start on a new page after the title page and should be typed in single-space to distinguish it from the Introduction. Abstracts should briefly reflect all aspects of the study, as most databases list mainly abstracts. Short Communications as well as Review Articles should have an Abstract.

**Key-words:** Provide four to eight appropriate key words after abstract.

Introduction: Shall start immediately after the Abstract, as the next paragraph, but should be typed in double-space. The Introduction should lead the reader to the importance of the study; tie-up published literature with the aims of the study and clearly states the rationale behind the investigation.
Materials and Methods: Shall start as a continuation to introduction on the same page. All important materials used along with their source shall be mentioned. The main methods used shall be briefly described, citing references. Trivial details may be avoided. New methods or substantially modified methods may be described in sufficient detail. The statistical method and the level of significance chosen shall be clearly stated. Current Research in Nutrition and Food Science Journal prefers to publish work that has been subjected to an appropriate statistical test at one level of significance.

Results: All findings presented in tabular or graphical form shall be described in this section. The data should be statistically analyzed and the level of significance stated. Data that is not statistically significant need only to be mentioned in the text – no illustration is necessary. All Tables and figures must have a title or caption and a legend to make them self-explanatory. Results section shall start after materials and methods section on the same page.

Discussion: This section should follow results, deal with the interpretation of results, convey how they help increase current understanding of the problem and should be logical. Unsupported hypothesis should be avoided. The Discussion should state the possibilities the results uncover, that need to be further explored. There is no need to include another title such as “Conclusions” at the end of Discussion. Results and discussion of results can also be combined under one section, Results and Discussion.

Acknowledgements: Should be given after the text and not in the form of foot-notes.

References: References should be numbered consecutively in the order in which they are first mentioned in the text (not in alphabetic order). Identify references in text, tables, and legends by Arabic numerals in superscript. References cited only in tables or figure legends should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure. Use the style of the examples below, which are based on the formats used by the NLM in Index Medicus. The titles of journals should be abbreviated according to the style used in Index Medicus. Use complete name of the journal for non-indexed journals. Avoid using abstracts as references. Information from manuscripts submitted but not accepted should be cited in the text as “unpublished observations” with written permission from the source. Avoid citing a “personal communication” unless it provides essential information not available from a public source, in which case the name of the person and date of communication should be cited in parentheses in the text. For scientific articles, contributors should obtain written permission and confirmation of accuracy from the source of a personal communication. Journal: Name of author(s), the journal, volume, page nos. and the year.

Book: Author’s name, title of the book, name and location of publisher, page and year of publication.

Illustrations: Tables – Should be typed on separate sheets of paper and should not preferably contain any molecular structures. Only MS word table format should be used for preparing tables. Tables should show lines separating columns but not those separating rows except for the top row that shows column captions. Tables should be numbered consecutively in Arabic numerals and bear a brief title in capital letters normal face. Units of measurement should be abbreviated and placed below the column headings. Column headings or captions hall be in bold face. It is essential that all tables have legends, which explain the contents of the table. Tables should not be very large that they run more than one A4 sized page. Tables should not be prepared in the landscape format, i. e. tables that are prepared widthwise on the paper.

Figures: Should be on separate pages but not inserted with in the text. Figures should be numbered consecutively in Arabic numerals and bear a brief title in lower case bold face letters below the figure. Graphs and bar graphs should preferably be prepared using Microsoft Excel and submitted as Excel graph pasted in Word. These graphs and illustrations should be drawn to approximately twice the printed size to obtain satisfactory reproduction. As far as possible, please avoid diagrams made with India ink on white drawing paper, cellophane sheet or tracing paper with hand written captions or titles. Photographs should be on glossy paper. Photographs should bear the names of the authors and the title of the paper on the back, lightly in pencil. Alternatively photographs and photomicrographs can be submitted as jpeg images. Figure and Table titles and legends should be typed on a separate page with numerals corresponding to the illustrations. Keys to symbols, abbreviations, arrows, numbers or letters used in the illustrations should not be written on the illustration itself but should be clearly explained in the legend. Avoid inserting a box with key to symbols, in the figure or below the figure. In case of photomicrographs, magnification should be mentioned either directly on them or in the legend. Symbols, arrows or letters used in photomicrographs should contrast with the background. Method of staining should also be mentioned in the legend.

Chemical terminology: The chemical nomenclature used must be in accordance with that used in the Chemical Abstracts.

Symbols and abbreviations: Unless specified otherwise, all temperatures are understood to be in degrees centigrade and need not be followed by the letter ‘C’. Abbreviations should be those well known in scientific literature. In vitro, in vivo, in situ, ex vivo, ad libitum, et al. and so on are two words each and should be written in italics. None of the above is a hyphenated word. All foreign language (other than English) names and words shall be in italics as a general rule. Words such as carrageenan-induced inflammation, paracetamol-induced hepatotoxicity, isoproterenol-induced myocardial necrosis, dose-dependent manner are all hyphenated.

Biological nomenclature: Names of plants, animals and bacteria should be in italics.

Enzyme nomenclature: The trivial names recommended by the IUPAC-IUB Commission should be used. When the enzyme is the main subject of a paper, its code number and systematic name should be stated at its first citation in the paper.

Spelling: These should be as in the Concise Oxford Dictionary of Current English.
Ethics of human and animal experimentation

Papers describing any experimental work with humans should include a statement that the Ethical Committee of the institution in which the work was done has approved it, and that the subjects gave informed consent to the work. Experiments with animals should be done in accordance with the legal requirements of the relevant local or national authority. Procedures should be such that experimental animals do not suffer unnecessarily. Papers should include details of the procedures and of anaesthetics used. The Editors will not accept papers where the ethical aspects are, in their opinion, open to doubt.

Copyright:

All articles published in this journal become the property of the Journal and should not be published or reproduced in any form in full or in part without the written permission of the Editor.

Refund policy:

Once the paper is accepted for publication and the payment is provided by the author. No refund will be granted due to any reason whatsoever.

Refund can only be provided if the journal failed to publish the article due to some unavoidable circumstances. This refund will exclude the banking processing charges.
